SUMMARY

Results-driven Data Analyst and BI Developer with hands-on experience in end-to-end data analysis, dashboard development, and business intelligence. Skilled in Power BI, SQL, Tableau, Python, Advanced Excel, Microsoft Fabric, and Microsoft Business Central, with a proven ability to transform complex datasets into actionable insights. Backed by two industry internships delivering real-world analytics solutions across agriculture and sales domains. Eager to bring technical expertise and a data-driven mindset to a forward-thinking organization.

SKILLS

- **Data Visualization & BI:** Power BI, Tableau, Microsoft Excel, DAX, Streamlit
- **Programming:** Python, SQL, Jupyter Notebook
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Plotly
- **Databases:** SQL Server (SSMS), MySQL, PostgreSQL
- **Data Analysis & Techniques:** EDA, ETL, Data Pipelines, Data Extraction, Data Transformation, Data Cleaning, Data Wrangling, Data Modeling, Dashboard Development, MIS Reporting, KPI Reporting, Business Reporting, Ad Hoc Reporting, Query Optimization, Stakeholder Reporting, Data Visualization, Data Management, Power Query
- **Soft Skills:** Analytical Thinking, Problem Solving, Data Storytelling, Attention to Detail, Cross-functional Collaboration

EXPERIENCE

Data Analytics Intern

INFOLABZ IT SERVICES

Jan 2026 – Apr 2026

- Built an end-to-end sales analytics dashboard using Python and Streamlit to visualize sales trends across regions, products, and salespersons.
- Developed data cleaning pipelines and calculated KPIs like total sales, growth rate, and average sales for time-based and category-wise analysis.
- Created interactive charts (line, bar, heatmap) with drill-down capabilities to identify high and low performing segments.
- Delivered a unified dashboard enabling faster, data-driven business decisions for sales strategy optimization.

PROJECTS

Diwali Sales — Exploratory Data Analysis | Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook

github.com/Piyushchhaiya5883/Data-Analysis

- Analyzed sales data across age groups, genders, and product categories to uncover key purchasing patterns and seasonal trends.
- Identified top-performing customer segments to improve their sales targeting and marketing strategies by 20% efficiency.
- Visualized insights through 15+ interactive charts using Matplotlib and Seaborn to support data-driven decision-making.

Blinkit Sales Dashboard | Power BI, DAX, Power Query, Microsoft Excel

github.com/Piyushchhaiya5883/blinkit-Dashboard

- Built an interactive dashboard to monitor sales trends, outlet performance, and item categories across multiple locations.
- Analyzed key KPIs like total sales revenue, average customer ratings, and item-type performance to identify growth opportunities.
- Surfaced actionable insights on inventory and outlet optimization to improve overall sales strategy and performance.

Intelligent Sales Analytics Dashboard | Python, Streamlit, Pandas, NumPy, Matplotlib, Plotly

github.com/Piyushchhaiya5883/App

- Built a multi-page interactive sales analytics dashboard analyzing ₹6.1M+ grocery sales data across 7 product categories, 5 regions, and 4 years (2015–2018).
- Developed data cleaning pipelines and computed KPIs (Total Sales, Profit, Orders, Avg Margin, Avg Discount) with dynamic global filters for Year, Region, and Category.
- Created 6 analytical modules including Category Analysis with treemap drill-down, Region & State comparisons, Customer Insights, and a Category vs Category benchmarking tool.
- Implemented interactive charts (line, bar, donut, heatmap, treemap) using Matplotlib, Seaborn, and Plotly, with a login/signup authentication system for secure user access.

India Retail Sales Dashboard | SQL Server (SSMS), Power BI, DAX, Power Query, Microsoft Excel

github.com/Piyushchhaiya5883/India-Retail-Sales-Dashboard

- Built an end-to-end retail sales dashboard analyzing ₹75.58M in sales data across 7 Indian states, 5 product categories, and 2 sales channels using SQL Server and Power BI.
- Wrote analytical SQL queries in SSMS for KPI aggregations, category-wise ranking, Top 10 products by profit, payment mode analysis, and monthly sales trends.
- Designed a Star Schema data model with a DAX DateTable, defined relationships, and created DAX measures for dynamic KPIs including Profit Margin, Total Orders, and Net Sales.
- Developed an interactive dashboard with 6+ visuals (line chart, bar chart, donut, map, table) and slicers for Year, Category, and State with cross-filtering enabled.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science

2022 - 2026

Government Engineering College, Rajkot

CGPA : 8.01

CERTIFICATIONS

- Python for Data Science — Cognitive Class
- Data Analysis with Python — Cognitive Class
- SQL Intermediate — Hacker Rank
- Deloitte - Data Analytics Job Simulation — Forage
